

Leading Manufacturer of Membrane Products in North America

AXEON is a world leader and your partner in the engineering and manufacturing of innovative membrane filtration systems and components.

Behind every AXEON product is our

Watermark of Distinction.™

AXEON is known as a leading water purification brand that represents quality, service and is proudly Made in the U.S.A.

Leading Water Purification

For more than three decades, AXEON Water Technologies has manufactured high-quality membrane and filtration products in the United States of America. Our commitment to the business and communities is demonstrated daily by our people and partners.

Partnering for Success

Our customers' success is our success. We take the time to build long-term partnerships with our customers, based on a keen understanding of their needs, a strong sense of loyalty and a spirit of going above and beyond. We use our expertise to develop superior products and our experience to deliver trusted customer support.

Industries Served

Our water purification solutions are for residential, commercial and industrial applications and in over 40 + markets and industries around the world.

Residential

Commercial

Industrial

Our Customers Come First

We supply the system or product you need – designed to meet your specific requirements – and provide exceptional customer and technical support.

Our products are engineered to provide superior performance, so you can be assured that your water purification solution meets your water quality standards.

Products & Solutions

Exclusive and Versatile System Designs

Distinctive and uniquely manufactured product lines, give our customers real value and a significant competitive advantage, that helps them to grow their business.

Residential, Commercial & Industrial Reverse Osmosis Systems

Our RO systems are designed for high efficiencies and recovery rates, minimal energy consumption and offer greater savings with low operation and maintenance costs.

Quality Engineered Components

AXEON offers an assortment of best-in-class components to help build and manage water purification systems. This includes membranes, housings, filters, chemicals, instrumentation and more. For precision quality and high performance, AXEON components offer competitive pricing and value.

At AXEON, we pride ourselves on providing best-in-class quality products and services. We're committed to excellence and our quality assurance system provides customers the confidence that every product has been built with a rigorous dedication to exceptional performance."

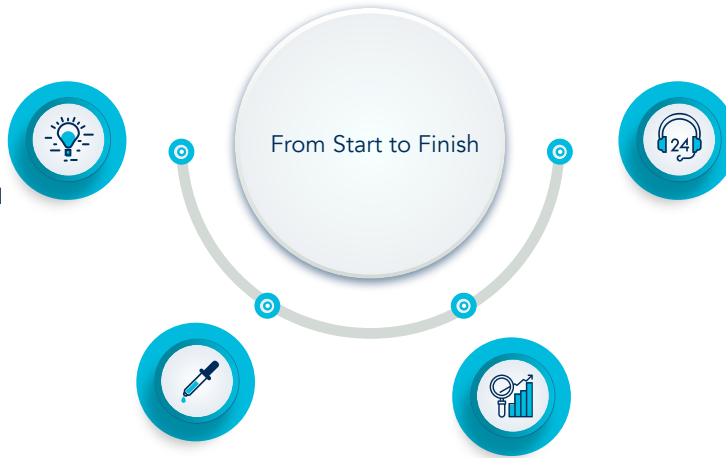

Augustin Pavel - CEO

From Concept to Delivery and Aftersales Service

Design & Development

We translate your requirements into customized products, designed and developed by our expert engineering personnel. Custom tooling, jigs and templates are designed to ensure an efficient, high quality manufacturing and smooth production process.

Delivery & Ongoing Customer Support

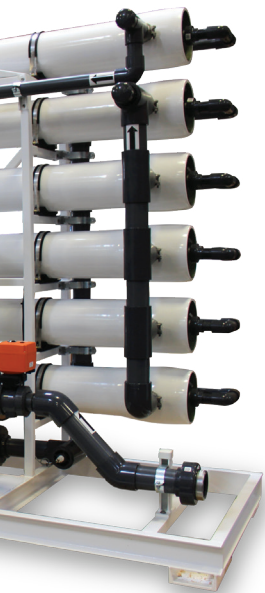

We pride ourselves on an exceptional customer experience, accompanying our customers every step of the way from design through delivery as well as comprehensive aftersales support.

Product Validation & Testing

Every product undergoes extensive validation, prototyping, testing and modification, to ensure they comply with regulatory requirements. Products are developed utilizing our proprietary technologies which deliver superior performance.

Lean Manufacturing

Onshore and offshore manufacturing with our pre-qualified supplier network ensures that the process combines precision low - cost production, that is repeatable.

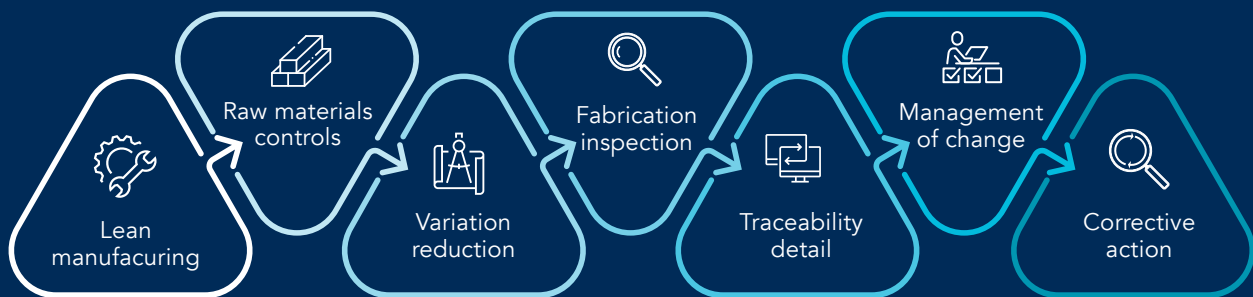

Exceptional Customer Service

Our professional and courteous Customer Service will assist you throughout your unique customer experience, from setting up your account to ordering and shipping. Should you have any concerns after receiving a shipment, our Customer Service Team will ensure they are resolved swiftly and courteously. We provide complimentary support for all current products within their specified warranty period. Our Technical Support services include pre-sale evaluation, start-up, operational problem resolution, and assistance with comprehensive documentation to perform specific tasks.

Best-In-Class Quality Products and Services

Our quality assurance system provides customers the confidence that every product has been built with a rigorous dedication to exceptional performance and a robust quality scheme. Our commitment to excellence is supported by the use of systematic process improvement and quality control, to ensure customer requirements and satisfaction are always at the forefront in all that we do.
